

COMMUNICATE *App*

Communicate App helps companies keep the employees engaged in a closed, safe environment with all the company decisions.

- ✓ Cross platform availability for iOS, Android (at request also for Windows and Blackberry)
- ✓ Secure AES 256 encryption of the stored content with a secured HTTPS server communication.
- ✓ Offline availability.

COMMUNICATE

The main focus of the Communicate app is to facilitate an easy and secure communication between company branches, project members or management levels.

- ✓ WhatsUp similar technology restricted only to a selected numbers of employees.
- ✓ 1 big chat room for the whole company and 1:1 chat rooms possible.
- ✓ Avatars and push notification to allow the usage of the app even if the app is not started.

BE INFORMED

You will never miss an announcement and since you are navigating on your phone you can check all the company news in the app.

- ✓ Notifications which are usually delivered using an internal Intranet are now exposed by push notifications in the Communicate App.
- ✓ Mark your news for later download and get access to them also in offline mode.
- ✓ Keep you informed with industry announcements using an sorted list of industry news pushed hourly to your app.

MOBILIZE

Beside the short way of communication using the chat function the Communicate Apps is also mobilizing your company processes like:

- ✓ Vacations requests and approval.
- ✓ Approval of business trips and budget requests.
- ✓ Notify you in case a new Intranet article is posted.
